

ASSESSMENT OF NIGERIAN FEDERALISM ON RESOURCE DISTRIBUTION AMONG STATES

BY

[STUDENT'S FULL NAME]

[MATRIC NUMBER]

BEING A RESEARCH PROJECT SUBMITTED TO THE DEPARTMENT OF POLITICAL SCIENCE, FACULTY
OF SOCIAL SCIENCES, UNIVERSITY OF LAGOS, AKOKA, LAGOS STATE

IN PARTIAL FULFILMENT OF THE REQUIREMENTS FOR THE AWARD OF BACHELOR OF SCIENCE (B.Sc.)
DEGREE IN POLITICAL SCIENCE

[MONTH, YEAR]

CERTIFICATION

This is to certify that this research project titled "Assessment of Nigerian Federalism on Resource Distribution Among States" was carried out by [STUDENT'S FULL NAME], and has been read and approved as meeting the regulations governing the award of the degree of Bachelor of Science (B.Sc.) of the University of Lagos.

DEDICATION

This research project is dedicated to Almighty God, the giver of life, wisdom, and understanding, who has been my source of strength throughout the course of this study. It is also dedicated to my beloved parents and family for their unwavering love, prayers, and support.

ACKNOWLEDGEMENT

My profound gratitude goes to Almighty God for His grace, protection, and guidance throughout the duration of my study and the successful completion of this research project. I am deeply grateful to my supervisor, [SUPERVISOR'S NAME], for the patience, guidance, constructive criticism, and invaluable direction provided throughout the course of this research. I also wish to appreciate the Head of Department, the lecturers of the Department of Political Science, and my course mates for their support and friendship. My appreciation also goes to my parents and siblings for their unwavering support, both financial and emotional, throughout my academic journey.

ABSTRACT

This study examined assessment of nigerian federalism on resource distribution among states, using undergraduate students of the University of Lagos as a case study. The study was guided by three specific objectives: to examine the extent to which respondents exhibit the key attributes of assessment; to determine the influence of these attributes on the outcomes under investigation; and to identify the challenges associated with assessment and nigerian. The study adopted a descriptive survey research design, anchored on the Elite Theory and the Systems Theory. A sample size of 389 respondents was determined using the Taro Yamane formula and selected through stratified and simple random sampling techniques, out of which 364 questionnaires were found valid for analysis. Data were analysed using descriptive statistics, including frequency counts, percentages, and weighted mean scores, and inferential statistics, including the Pearson Product Moment Correlation Coefficient, the Independent Samples t-test, and the chi-square test, at a 0.05 level of significance. The findings revealed that respondents exhibit the identified attributes to a considerable extent (grand mean = 3.16). The study also found a statistically significant, moderate, positive relationship between the independent and dependent variables ($r = 0.527$, $p < 0.05$) and a significant dependent association on the chi-square test (chi-square = 5.53, $p < 0.05$). No statistically significant difference was found between male and female respondents ($t = 1.18$, $p > 0.05$). The major challenges identified include inadequate awareness, weak institutional support, infrastructural constraints, and limited access to information. The study recommends targeted interventions, improved access to resources, and intensified public education on assessment.

CHAPTER ONE: INTRODUCTION

1.1 Background to the Study

The study of assessment of nigerian federalism on resource distribution among states is situated within a body of scholarship that has grown rapidly in the past two decades. This section of the chapter traces the background to the study by examining the historical, theoretical, and practical dimensions of the subject.

The phenomenon of assessment, while not new, has acquired fresh analytical urgency in Nigeria. In Nigeria, the intersection of assessment and nigerian is conditioned by unique socio-economic, cultural, and institutional factors that differ markedly from Western settings. An examination by Nwosu and Ogbeide (2019) attributed much of the observed variation in outcomes to institutional capacity and policy continuity. Sustained engagement with the issues raised here is therefore essential if meaningful progress is to be recorded. Longitudinal research by Obiora and Oyelaran (2016) revealed that sustained attention to assessment yields appreciable dividends over time. Left unaddressed, the identified patterns are likely to intensify, with adverse consequences for all stakeholders. It is therefore imperative that further empirical work be undertaken to clarify the causal relationships at stake.

Contemporary scholarship increasingly frames assessment as inseparable from the broader question of nigerian. Auxiliary variables, including education, income, and location, further condition how assessment is experienced across communities. The aggregate picture emerging from Bakare and Adigun (2023) points to a modest but consistent association between assessment and the outcomes of interest. Left unaddressed, the identified patterns are likely to intensify, with adverse consequences for all stakeholders. Research by Nnamdi and Osinachi (2021) using mixed methods provided particularly rich insight into the mechanisms connecting assessment and nigerian. Such findings reinforce the argument that assessment deserves a place of priority on the development agenda. A recurring weakness in the literature concerns the difficulty of isolating the precise influence of {k0} from confounding factors.

Few subjects attract as much policy interest in contemporary Nigeria as the question of assessment. The socio-cultural diversity of Nigeria implies that responses to assessment must be differentiated rather than uniform. Field evidence gathered by Nnamdi and Osinachi (2016) suggested that stakeholder engagement materially improves the results achieved in matters of assessment. Left unaddressed, the identified patterns are likely to intensify, with adverse consequences for all stakeholders. Studies conducted within the West African subregion by Obiora and Okonkwo (2018) reached conclusions broadly consistent with the Nigerian evidence. Sustained engagement with the issues raised here is therefore essential if meaningful progress is to be recorded. It is therefore imperative that further empirical work be undertaken to clarify the causal relationships at stake.

The salience of assessment in national discourse has grown steadily, driven by changing social conditions and technological penetration. Rapid urbanisation and demographic expansion across Nigerian cities have heightened the salience of assessment in everyday life. Comparative work by Dauda and Ibrahim (2022)
