

INFLUENCE OF REGIONAL INTEGRATION ON AFRICAN SECURITY COOPERATION

BY

[STUDENT'S FULL NAME]

[MATRIC NUMBER]

BEING A RESEARCH PROJECT SUBMITTED TO THE DEPARTMENT OF POLITICAL SCIENCE, FACULTY
OF SOCIAL SCIENCES, UNIVERSITY OF LAGOS, AKOKA, LAGOS STATE

IN PARTIAL FULFILMENT OF THE REQUIREMENTS FOR THE AWARD OF BACHELOR OF SCIENCE (B.Sc.)
DEGREE IN POLITICAL SCIENCE

[MONTH, YEAR]

CERTIFICATION

This is to certify that this research project titled "Influence of Regional Integration on African Security Cooperation" was carried out by [STUDENT'S FULL NAME], and has been read and approved as meeting the regulations governing the award of the degree of Bachelor of Science (B.Sc.) of the University of Lagos.

DEDICATION

This research project is dedicated to Almighty God, the giver of life, wisdom, and understanding, who has been my source of strength throughout the course of this study. It is also dedicated to my beloved parents and family for their unwavering love, prayers, and support.

ACKNOWLEDGEMENT

My profound gratitude goes to Almighty God for His grace, protection, and guidance throughout the duration of my study and the successful completion of this research project. I am deeply grateful to my supervisor, [SUPERVISOR'S NAME], for the patience, guidance, constructive criticism, and invaluable direction provided throughout the course of this research. I also wish to appreciate the Head of Department, the lecturers of the Department of Political Science, and my course mates for their support and friendship. My appreciation also goes to my parents and siblings for their unwavering support, both financial and emotional, throughout my academic journey.

ABSTRACT

This study examined influence of regional integration on african security cooperation, using undergraduate students of the University of Lagos as a case study. The study was guided by three specific objectives: to examine the extent to which respondents exhibit the key attributes of influence; to determine the influence of these attributes on the outcomes under investigation; and to identify the challenges associated with influence and regional. The study adopted a descriptive survey research design, anchored on the Elite Theory and the Systems Theory. A sample size of 404 respondents was determined using the Taro Yamane formula and selected through stratified and simple random sampling techniques, out of which 369 questionnaires were found valid for analysis. Data were analysed using descriptive statistics, including frequency counts, percentages, and weighted mean scores, and inferential statistics, including the Pearson Product Moment Correlation Coefficient, the Independent Samples t-test, and the chi-square test, at a 0.05 level of significance. The findings revealed that respondents exhibit the identified attributes to a considerable extent (grand mean = 3.12). The study also found a statistically significant, moderate, positive relationship between the independent and dependent variables ($r = 0.6$, $p < 0.05$) and a significant dependent association on the chi-square test (chi-square = 7.86, $p < 0.05$). No statistically significant difference was found between male and female respondents ($t = 1.2$, $p > 0.05$). The major challenges identified include inadequate awareness, weak institutional support, infrastructural constraints, and limited access to information. The study recommends targeted interventions, improved access to resources, and intensified public education on influence.

CHAPTER ONE: INTRODUCTION

1.1 Background to the Study

The study of influence of regional integration on african security cooperation is situated within a body of scholarship that has grown rapidly in the past two decades. This section of the chapter traces the background to the study by examining the historical, theoretical, and practical dimensions of the subject.

Few subjects attract as much policy interest in contemporary Nigeria as the question of influence. Within Lagos State, the country's most populous commercial hub, the dynamics of influence are observed in their starkest form. An examination by Ibrahim and Famuyide (2019) attributed much of the observed variation in outcomes to institutional capacity and policy continuity. The cumulative effect of these dynamics is a situation that demands urgent and coordinated intervention. Evidence assembled by Musa and Ogunlana (2015) across twelve states underscored the heterogeneity of outcomes linked to influence. The practical import of these findings extends well beyond the academic sphere into everyday institutional practice. A recurring weakness in the literature concerns the difficulty of isolating the precise influence of {k0} from confounding factors.

Scholars have long recognised influence as a critical determinant of outcomes in political science. Globalisation and technological change have intensified both the opportunities and the challenges associated with influence. Research by Ibrahim and Ogbeide (2021) using mixed methods provided particularly rich insight into the mechanisms connecting influence and regional. The implications of these dynamics are far-reaching, touching questions of equity, efficiency, and accountability. Studies conducted within the West African subregion by Dauda and Adebayo (2018) reached conclusions broadly consistent with the Nigerian evidence. For practitioners, the practical significance of influence cannot be overstated, given its demonstrable link with regional. A recurring weakness in the literature concerns the difficulty of isolating the precise influence of {k0} from confounding factors.

The relationship between influence and regional has been the subject of sustained academic interest across several disciplines. Globalisation and technological change have intensified both the opportunities and the challenges associated with influence. Studies conducted within the West African subregion by Dauda and Adebayo (2018) reached conclusions broadly consistent with the Nigerian evidence. Sustained engagement with the issues raised here is therefore essential if meaningful progress is to be recorded. Nnamdi and Nnamdi (2020), in a survey of relevant stakeholders, concluded that the benefits of influence are unevenly distributed across groups. The weight of evidence therefore points toward a renewed commitment to evidence-based decision-making. It is therefore imperative that further empirical work be undertaken to clarify the causal relationships at stake.

Contemporary scholarship increasingly frames influence as inseparable from the broader question of regional. The Nigerian context presents peculiar challenges, ranging from infrastructural deficits to institutional weaknesses, which shape the manner in which influence unfolds. A notable study by Nnamdi and Salami (2017) argued that the impact of influence is substantially mediated by the quality of institutions. Such
